Background

- ✦ **EO 13423 identified that Env Mgt Systems will be implemented at all appropriate organizational levels.**
 - ◆ OFEE developed implementing instructions
 - Further guidance identified multi-site Organization EMS
 - ◆ The ANG had been implementing an organizational EMS since 2006
 - OFEE guidance allowed ANG to adjust appropriate facility status—78 appropriate facilities, now 1 EMS

ANG Installations

✦ ANG has 174 locations

- ◆ 85 flying units—82 located on civilian airports
- ◆ The rest of the locations are GSUs w/combat engineering or communication units
- ◆ Typically 1 environmental functional, but only at Wing level
 - Env Mgrs=Jack of all trades—master of some
 - Subject Matter Experts at ANGRC
 - Centrally manage programs—installations implement

How to implement multi-site EMS: ANGRC

- ✦ EMS procedural elements defined at ANGRC
- ✦ Centrally develop/manage operational controls at programmatic level
- ✦ Centrally define processes (activities that impact environment)
- ✦ Centrally identify aspects by program area
 - ◆ Prioritized for ANG as a whole
- ✦ Objectives established for ANG by program area

How to implement multi-site EMS: Installation

♦ Supplement & Implement

- ♦ Installations supplement procedural elements, operational controls, and aspect prioritization
- ♦ Objectives and targets support ANG and installation
- ♦ Programming/funding tied to significant aspects

ANG Multi-site Organizational EMS

- ✦ **ANGRC provides policy, planning, & resources/funding**
- ✦ **Installations make it happen-implement**
- ✦ **ANGRC Checks**
- ✦ **ANGRC and Installation report to leadership**

Start all over again

How do you communicate and “share” this

✦ **ANG utilizes MS Office SharePoint Services**

- ◆ Hosted on Guard Knowledge Online (GKO)
- ◆ Backbone of EMS
- ◆ Leverages other data sources

✦ **Established Virtual Env Mgt Office**

- ◆ Top level at ANGRC
- ◆ All previous appropriate facilities have subsite
- ◆ Standardized sites
 - Share procedural elements

Share programmatic organization

Quick facts about navigating VEMO

VEMO is meant to be the electronic management tool for ANG Environmental Management. It serves the purpose of our electronic EMS Manual. Within A7 and at the installation the intent is that VEMO picks up most of the document storage and control typically managed by local share drives, as well as allowing us to eventually take advantage of additional SharePoint tools

VEMO

The Virtual Environmental Management Office (VEMO), leverages SharePoint capabilities to become the Air National Guard's (ANG) electronic Environmental Management System (EMS) Manual. VEMO allows the ANG to communicate and implement the ISO 14001 EMS elements, and fulfill Executive Order and other requirements. VEMO provides the tools necessary to demonstrate conformance and enhance the auditability of the entire system. The ANG EMS is implemented at the organizational level, and cascades down to our multiple ANG bases across the United States and territories.

Environmental Field Advisory Council (EFAC) Overview

The Environmental Field Advisory Council (EFAC) mission is to advise the Chief, Asset Management and the Director of Installations and Mission Support in developing environmental strategy and tools to sustain the ANG. The EFAC will advise and assist NGB/A7 in developing, maintaining, and implementing the ANG environmental programs. They will represent the interests of ANG units within the 54 states and territories and will review specific environmental issues or problems and recommend solutions. They will assist NGB/A7 in providing information to, and obtaining information from, units in the states and territories, as required for special projects or program implementation. In short, they will act as the sounding committee for NGB/A7 in developing environmental program implementation strategies and as liaison between the field and NGB/A7.

EFAC Charter

MISSION STATEMENT. The EFAC will advise The Chief, Asset Management and the Director of Installations and Mission Support in developing environmental strategy and tools to sustain the Air National Guard mission.

PURPOSE, ROLES AND RESPONSIBILITIES.

The EFAC shall:

- Advise and assist NGB/A7A in developing, maintaining and implementing the Air National Guard (ANG) environmental programs.
- Recommend guidance and policy to NGB/A7A in executing environmental objectives and the overall ANG environmental programs.
- Represent the interests of ANG units within the 54 states and territories in working with ANG environmental program issues that affect all or significant portions of the units in the states and territories.
- Act as a sounding committee for NGB/A7 staff in developing environmental program implementation strategies.
- Review specific environmental issues.
- Assist NGB/A7A in providing information for program implementation.
- Communicate with each unit frequently.
- Solicit input and concerns from environmental units.

VEMO

The Virtual Environmental Management Office (VEMO), leverages SharePoint capabilities to become the Air National Guard's (ANG) electronic Environmental Management System (EMS) Manual. VEMO allows the ANG to communicate and implement the ISO 14001 EMS elements, and fulfill Executive Order and other requirements. VEMO provides the tools necessary to demonstrate conformance and enhance the auditability of the entire system. The ANG EMS is implemented at the organizational level, and cascades down to our multiple ANG bases across the United States and territories.

ANG VEMO News and Updates

Pest Management Certification Training

11/2/2009 1:25 PM
by Mr. Keith M Harris

In accordance with DODI 4150.7 and AFI 32-1053, the following actions are required to be granted DOD pesticide certification.

1. Attends Tech school and completes OJT/DOC within 2 years
2. Already has initial certificate and attends recertification...

Clicking on the Environmental Documents folder or on any “Related Documents” link on the different pages will take you to this library. At the ANG level, only VEMO PMs have access to manage the documents—anyone can view though. At the installation, it is similarly managed with installation VEMO managers having access. NOTE: ANG VEMO Program Managers will also have the ability to manage documents at your installation. The purpose will be for us to post documents and items that we centrally manage here but are related to your installation within that PM

In order to have a document show up on the correct programmatic page or site, you must associate these items within the document properties. This

automatically happens when you upload single documents, but if you upload multiple documents this doesn't happen. At anytime, you can edit the document properties, by clicking the drop down associated with the document. You can only do this when you are in the document library; when you are at the program pages and you see the related documents on that page, you are not actually in the document library, it is more a link to the document.

Choose the correct related program, and add it to the shuttle box, determine whether it is an EMS document, and identify the document type. We have intentionally limited the document types to only a few, we have also provided examples. Hit OK and it will now show up on the appropriate page. If you choose multiple program areas or EMS elements it will show up on all those sites and grouped by the document type.
